ABSTRACTED-PUB-NO: RU 2103449C

BASIC-ABSTRACT:

The assembly consists of a wash hand basin (1) fitted above a front loading washing machine (2) which has transverse dimensions smaller than those of the basin.

The length and width of the basin in proportion to its depth are in a ratio of 30-62:12-30 and 42-67:12-30 respectively. The waste outlet (5) of the basin is located in or adjacent to its rear wall, and the washing machine's used water outlet can be coupled to the basin waste pipe above its trap, which is linked to a common drain pipe (12). In addition, the basin can be set above the washing machine with a gap for maintenance purposes, or close-coupled to it.

ADVANTAGE - Design simplicity and economy of materials and space.
